South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Duke, along with too many companies and corporations, cares only about their bottom line; greed. Investing in clean and renewable energies will not only help their image, it will help our collective health and well being.

Sincerely,

Dena Christine
